

I submit this document on behalf of Nathaniel Colvin. I have known Nathaniel professionally, just over two years. During this time, I have been closely involved with many of the assignments, projects and tasks Nathaniel has been given direct responsibility. Nathaniel is constantly probing into the "depths of tomorrow" seeking to find more improved methods, opportunities and resources to better serve the DePauw University community relative to Computer/Information Technology.

I have observed Nathaniel grow in attitude, character and leadership. He is committed to providing the best possible service to his customers. When given an assignment or task, Nathaniel is very methodical in analyzing, testing and executing his finished product. He has demonstrated a deep passion and love for his work. Over the course of the last eight months, I have observed Nathaniel "step up to the plate" and assume a very mission critical role in creating, testing and providing academic, departmental and standard images for DePauw University. His commitment and dedication have been exemplary. Nathaniel strives to provide a very high level of professionalism when communicating and interacting relative customer service.

Nathaniel has a fervent desire to work, and be more closely involved with students. He has assisted me, during this past summer, working in a key leadership role, coordinating, organizing and supervising many of our summer student employees. Nathaniel has continually expressed his interest and desire to assume more of a key leadership role in IT that would allow him the capability of pursuing his ultimate dream - being able to work "one on one" with students. I believe that Nathaniel would be a very influential and key role model for students in IT at DePauw.
